NOTE duration: "00:01:30.026"

NOTE Confidence: 0.99370295

00:00:00.799 --> 00:00:01.920 This is a really active

NOTE Confidence: 0.99370295

00:00:01.920 --> 00:00:03.679 area of research and could

NOTE Confidence: 0.99370295

00:00:03.679 --> 00:00:04.880 be due to many different

NOTE Confidence: 0.99370295

00:00:04.880 --> 00:00:06.799 factors linked with, some of

NOTE Confidence: 0.99370295

00:00:06.799 --> 00:00:07.919 these statistics that we see

NOTE Confidence: 0.99370295

00:00:07.919 --> 00:00:09.595 for early onset breast cancer.

NOTE Confidence: 0.99370295

00:00:09.914 --> 00:00:10.875 Some of the factors could

NOTE Confidence: 0.99370295

00:00:10.875 --> 00:00:12.475 be biologic reasons for why

NOTE Confidence: 0.99370295

00:00:12.475 --> 00:00:13.675 these cancers could be more

NOTE Confidence: 0.99370295

00:00:13.675 --> 00:00:14.175 aggressive,

NOTE Confidence: 0.9737361

00:00:14.955 --> 00:00:16.395 as well as genetic factors

NOTE Confidence: 0.9737361

00:00:16.395 --> 00:00:17.595 that could be driving the

NOTE Confidence: 0.9737361

00:00:17.595 --> 00:00:19.770 development of these more aggressive

NOTE Confidence: 0.9737361

00:00:19.829 --> 00:00:20.329 cancers.

NOTE Confidence: 0.9919664

00:00:20.870 --> 00:00:21.510 I think one of the
NOTE Confidence: 0.9919664

00:00:21.510 --> 00:00:23.690 biggest factors is screening impacting,
NOTE Confidence: 0.9920014

00:00:24.390 --> 00:00:25.910 the more aggressive nature of
NOTE Confidence: 0.9920014

00:00:25.910 --> 00:00:27.225 these cancers or perhaps more
NOTE Confidence: 0.9920014

00:00:27.225 --> 00:00:28.525 late stage identification
NOTE Confidence: 0.9650361

00:00:28.905 --> 00:00:29.805 of these cancers.
NOTE Confidence: 0.99165046

00:00:30.345 --> 00:00:31.785 We know that, it's really
NOTE Confidence: 0.99165046

00:00:31.785 --> 00:00:32.985 important to adhere to breast
NOTE Confidence: 0.99165046

00:00:32.985 --> 00:00:34.690 cancer screening guidelines in the
NOTE Confidence: 0.99165046

00:00:34.850 --> 00:00:36.370 population to catch these cancers
NOTE Confidence: 0.99165046

00:00:36.370 --> 00:00:38.229 when they're early and curable
NOTE Confidence: 0.993468

00:00:38.609 --> 00:00:39.350 and treatable.
NOTE Confidence: 0.9913112

00:00:39.809 --> 00:00:40.850 And what we noticed in
NOTE Confidence: 0.9913112

00:00:40.850 --> 00:00:42.850 the COVID nineteen pandemic is
NOTE Confidence: 0.9913112

00:00:42.850 --> 00:00:44.614 that screening rates were not
NOTE Confidence: 0.9913112

00:00:44.614 --> 00:00:45.655 able to be adhered to

NOTE Confidence: 0.9913112
00:00:45.655 --> 00:00:47.175 because of the pandemic going
NOTE Confidence: 0.9913112
00:00:47.175 --> 00:00:48.774 on. And so one of
NOTE Confidence: 0.9913112
00:00:48.774 --> 00:00:49.735 the biggest things to keep
NOTE Confidence: 0.9913112
00:00:49.735 --> 00:00:50.854 in mind is have the
NOTE Confidence: 0.9913112
00:00:50.854 --> 00:00:52.695 screening done, at the right
NOTE Confidence: 0.9913112
00:00:52.695 --> 00:00:53.800 time. And some of the
NOTE Confidence: 0.9913112
00:00:53.800 --> 00:00:55.480 factors that influence that could
NOTE Confidence: 0.9913112
00:00:55.480 --> 00:00:55.960 be,
NOTE Confidence: 0.9779554
00:00:56.360 --> 00:00:57.880 knowledge of family history. So
NOTE Confidence: 0.9779554
00:00:57.880 --> 00:00:59.160 breast cancer screening might need
NOTE Confidence: 0.9779554
00:00:59.160 --> 00:01:00.120 to start at a younger
NOTE Confidence: 0.9779554
00:01:00.120 --> 00:01:01.720 age if there's a family
NOTE Confidence: 0.9779554
00:01:01.720 --> 00:01:03.475 history of breast cancer. And
NOTE Confidence: 0.9779554
00:01:03.475 --> 00:01:05.155 therefore, if screening isn't started,
NOTE Confidence: 0.995212
00:01:05.475 --> 00:01:06.994 at the right time, these
NOTE Confidence: 0.995212

00:01:06.994 --> 00:01:08.435 cancers that are detected could

NOTE Confidence: 0.995212

00:01:08.435 --> 00:01:09.635 be detected at a later

NOTE Confidence: 0.995212

00:01:09.635 --> 00:01:10.755 stage and could be more

NOTE Confidence: 0.995212

00:01:10.755 --> 00:01:11.255 aggressive.

NOTE Confidence: 0.99838626

00:01:11.670 --> 00:01:12.709 I think it really points

NOTE Confidence: 0.99838626

00:01:12.709 --> 00:01:13.670 to the need to emphasize

NOTE Confidence: 0.99838626

00:01:13.670 --> 00:01:15.670 public awareness about the need

NOTE Confidence: 0.99838626

00:01:15.670 --> 00:01:17.110 for breast cancer screening and

NOTE Confidence: 0.99838626

00:01:17.110 --> 00:01:18.884 knowledge of family history and

NOTE Confidence: 0.99838626

00:01:18.884 --> 00:01:20.325 then more research that is

NOTE Confidence: 0.99838626

00:01:20.325 --> 00:01:21.444 needed to get some insights

NOTE Confidence: 0.99838626

00:01:21.444 --> 00:01:22.725 about the aggressiveness of these

NOTE Confidence: 0.99838626

00:01:22.725 --> 00:01:23.225 cancers.
