

WEBVTT

NOTE duration: "00:03:04.661"

NOTE Confidence: 0.9891583

00:00:00.880 --> 00:00:02.080 This is a really important

NOTE Confidence: 0.9891583

00:00:02.080 --> 00:00:03.679 thing to think about regarding

NOTE Confidence: 0.9891583

00:00:03.679 --> 00:00:05.380 patients with early onset cancers,

NOTE Confidence: 0.9680465

00:00:06.240 --> 00:00:07.520 and the reason why we're

NOTE Confidence: 0.9680465

00:00:07.520 --> 00:00:08.980 developing an entire program

NOTE Confidence: 0.9705772

00:00:09.375 --> 00:00:10.835 addressing these patients.

NOTE Confidence: 0.9902859

00:00:11.295 --> 00:00:12.414 Really, there can be support

NOTE Confidence: 0.9902859

00:00:12.414 --> 00:00:14.115 that's needed from a psychosocial

NOTE Confidence: 0.9975879

00:00:14.495 --> 00:00:14.995 standpoint,

NOTE Confidence: 0.99227333

00:00:15.455 --> 00:00:17.395 from a physical functioning standpoint,

NOTE Confidence: 0.992391

00:00:17.770 --> 00:00:18.730 and also from a mental

NOTE Confidence: 0.992391

00:00:18.730 --> 00:00:20.110 health standpoint. So,

NOTE Confidence: 0.9945451

00:00:20.890 --> 00:00:22.489 really, we've noted, of course,

NOTE Confidence: 0.9945451

00:00:22.489 --> 00:00:23.470 that these individuals

NOTE Confidence: 0.9633503

00:00:23.930 --> 00:00:25.630 who have early onset cancers,

NOTE Confidence: 0.9633503

00:00:25.905 --> 00:00:26.865 and again, that can be

NOTE Confidence: 0.9633503

00:00:26.865 --> 00:00:28.225 defined as ages eighteen to

NOTE Confidence: 0.9633503

00:00:28.225 --> 00:00:29.025 forty nine,

NOTE Confidence: 0.9601866

00:00:30.065 --> 00:00:31.905 are really, individuals who have

NOTE Confidence: 0.9601866

00:00:31.905 --> 00:00:34.005 multiple responsibilities in their lives.

NOTE Confidence: 0.9170742

00:00:34.700 --> 00:00:36.479 Oftentimes, they are employed.

NOTE Confidence: 0.9877849

00:00:36.940 --> 00:00:38.620 They are parents. They're taking

NOTE Confidence: 0.9877849

00:00:38.620 --> 00:00:40.220 care of children. They're also

NOTE Confidence: 0.9877849

00:00:40.220 --> 00:00:42.560 caregivers for elderly parents or,

NOTE Confidence: 0.99944085

00:00:43.025 --> 00:00:44.325 other members of their family.

NOTE Confidence: 0.87860984

00:00:45.025 --> 00:00:46.405 All of these things really

NOTE Confidence: 0.87860984

00:00:46.465 --> 00:00:47.845 are, can pose,

NOTE Confidence: 0.98638344

00:00:48.385 --> 00:00:50.625 a significant level of, kind

NOTE Confidence: 0.98638344

00:00:50.625 --> 00:00:52.290 of add overwhelm to a

NOTE Confidence: 0.98638344

00:00:52.370 --> 00:00:53.890 person's own feeling that they

NOTE Confidence: 0.98638344

00:00:53.890 --> 00:00:55.110 have a cancer diagnosis

NOTE Confidence: 0.97143465

00:00:55.490 --> 00:00:56.710 and they have these responsibilities

NOTE Confidence: 0.97143465

00:00:56.850 --> 00:00:57.670 on their plates.

NOTE Confidence: 0.98673326

00:00:58.290 --> 00:00:59.970 There's also some unique challenges

NOTE Confidence: 0.98673326

00:00:59.970 --> 00:01:01.570 to talk about or, help

NOTE Confidence: 0.98673326

00:01:01.570 --> 00:01:03.475 patients walk through some scenarios

NOTE Confidence: 0.98673326

00:01:03.475 --> 00:01:04.995 that can impact them in

NOTE Confidence: 0.98673326

00:01:04.995 --> 00:01:06.035 terms of their quality of

NOTE Confidence: 0.98673326

00:01:06.035 --> 00:01:07.735 life. So for example, fertility

NOTE Confidence: 0.98673326

00:01:07.875 --> 00:01:08.675 issues that can be,

NOTE Confidence: 0.9927138

00:01:10.390 --> 00:01:11.189 you know, that need to

NOTE Confidence: 0.9927138

00:01:11.189 --> 00:01:12.470 be discussed with these patients

NOTE Confidence: 0.9927138

00:01:12.470 --> 00:01:13.670 in terms of maintaining or

NOTE Confidence: 0.9927138

00:01:13.670 --> 00:01:14.649 preserving fertility,

NOTE Confidence: 0.9820136

00:01:15.189 --> 00:01:16.310 which can be impacted by

NOTE Confidence: 0.9820136

00:01:16.310 --> 00:01:17.770 certain treatments or surgeries.

NOTE Confidence: 0.99814916

00:01:18.630 --> 00:01:19.130 Sexuality

NOTE Confidence: 0.9193238

00:01:19.430 --> 00:01:20.885 can be impacted as well.

NOTE Confidence: 0.9569418

00:01:21.345 --> 00:01:22.385 And as well as social

NOTE Confidence: 0.9569418

00:01:22.385 --> 00:01:24.465 functioning. So oftentimes, these individuals

NOTE Confidence: 0.9569418

00:01:24.465 --> 00:01:25.905 may feel very isolated from

NOTE Confidence: 0.9569418

00:01:25.905 --> 00:01:27.365 their peers, from their communities,

NOTE Confidence: 0.9966981

00:01:28.390 --> 00:01:29.750 and have an impact on

NOTE Confidence: 0.9966981

00:01:29.750 --> 00:01:31.110 their self esteem. And so

NOTE Confidence: 0.9966981

00:01:31.110 --> 00:01:31.930 all of these

NOTE Confidence: 0.98510087

00:01:32.310 --> 00:01:33.610 really can have an interplay

NOTE Confidence: 0.98510087

00:01:33.670 --> 00:01:34.950 on how the patient is

NOTE Confidence: 0.98510087

00:01:34.950 --> 00:01:37.045 having their experience with not

NOTE Confidence: 0.98510087

00:01:37.045 --> 00:01:38.485 only a cancer diagnosis, but

NOTE Confidence: 0.98510087

00:01:38.485 --> 00:01:39.384 in their life,

NOTE Confidence: 0.99706745

00:01:40.084 --> 00:01:41.365 even in terms of maintaining

NOTE Confidence: 0.99706745

00:01:41.365 --> 00:01:41.865 employment.

NOTE Confidence: 0.99768335

00:01:42.165 --> 00:01:43.604 So having breaks from their

NOTE Confidence: 0.99768335

00:01:43.604 --> 00:01:45.064 job to go get treatments

NOTE Confidence: 0.99768335

00:01:45.125 --> 00:01:46.505 or recover from surgery

NOTE Confidence: 0.9733818

00:01:46.840 --> 00:01:48.040 could be very stressful to

NOTE Confidence: 0.9733818

00:01:48.040 --> 00:01:49.480 think about. So there's the

NOTE Confidence: 0.9733818

00:01:49.480 --> 00:01:50.680 psychosocial needs that have to

NOTE Confidence: 0.9733818

00:01:50.680 --> 00:01:51.980 be addressed for these patients.

NOTE Confidence: 0.9970711

00:01:52.360 --> 00:01:53.500 Physically, of course,

NOTE Confidence: 0.9490493

00:01:53.880 --> 00:01:55.000 recovery from, say, from a

NOTE Confidence: 0.9490493

00:01:55.000 --> 00:01:55.500 surgery,

NOTE Confidence: 0.9589541

00:01:56.085 --> 00:01:57.604 is really, can be very

NOTE Confidence: 0.9589541

00:01:57.604 --> 00:01:59.205 challenging. And again, these are

NOTE Confidence: 0.9589541

00:01:59.205 --> 00:02:00.265 very busy individuals,

NOTE Confidence: 0.9938041

00:02:00.565 --> 00:02:02.165 so recovery from a surgery

NOTE Confidence: 0.9938041

00:02:02.165 --> 00:02:03.604 plus jumping back into life
NOTE Confidence: 0.9938041

00:02:03.604 --> 00:02:04.665 can be very challenging.
NOTE Confidence: 0.9942357

00:02:05.570 --> 00:02:07.350 Long term toxicity from chemotherapies
NOTE Confidence: 0.9942357

00:02:07.570 --> 00:02:09.030 or other treatments, radiation
NOTE Confidence: 0.9719578

00:02:09.569 --> 00:02:10.530 could be something that these
NOTE Confidence: 0.9719578

00:02:10.530 --> 00:02:11.810 patients grapple with as well,
NOTE Confidence: 0.9719578

00:02:11.810 --> 00:02:12.850 and so we need know
NOTE Confidence: 0.9719578

00:02:12.850 --> 00:02:14.389 that they need support physically.
NOTE Confidence: 0.9891486

00:02:15.225 --> 00:02:16.505 And these things can entail
NOTE Confidence: 0.9891486

00:02:16.505 --> 00:02:19.405 physical therapy, occupational therapy, etcetera,
NOTE Confidence: 0.9724034

00:02:19.865 --> 00:02:21.145 other ways to think about,
NOTE Confidence: 0.9724034

00:02:21.385 --> 00:02:22.525 you know, really getting,
NOTE Confidence: 0.9817593

00:02:23.330 --> 00:02:25.010 back to full functioning, from
NOTE Confidence: 0.9817593

00:02:25.010 --> 00:02:25.990 a physical standpoint.
NOTE Confidence: 0.9233678

00:02:26.530 --> 00:02:27.730 Certainly from the mental health
NOTE Confidence: 0.9233678

00:02:27.730 --> 00:02:28.230 standpoint,

NOTE Confidence: 0.9772664

00:02:28.690 --> 00:02:29.889 we know that this can

NOTE Confidence: 0.9772664

00:02:29.889 --> 00:02:31.775 be very challenging. These individuals

NOTE Confidence: 0.9772664

00:02:31.775 --> 00:02:32.815 are dealing with a new

NOTE Confidence: 0.9772664

00:02:32.815 --> 00:02:34.495 cancer diagnosis at a young

NOTE Confidence: 0.9772664

00:02:34.495 --> 00:02:35.775 age, and it can be

NOTE Confidence: 0.9772664

00:02:35.775 --> 00:02:36.655 very tough to cope with

NOTE Confidence: 0.9772664

00:02:36.655 --> 00:02:38.014 a cancer diagnosis at any

NOTE Confidence: 0.9772664

00:02:38.014 --> 00:02:39.294 age, let alone at a

NOTE Confidence: 0.9772664

00:02:39.294 --> 00:02:40.889 younger age. But also there

NOTE Confidence: 0.9772664

00:02:40.889 --> 00:02:41.790 can be underlying

NOTE Confidence: 0.9977856

00:02:42.250 --> 00:02:43.690 depression and anxiety that could

NOTE Confidence: 0.9977856

00:02:43.690 --> 00:02:44.430 be exacerbated

NOTE Confidence: 0.98136497

00:02:45.050 --> 00:02:47.209 by a cancer diagnosis in

NOTE Confidence: 0.98136497

00:02:47.209 --> 00:02:48.235 addition to all of the

NOTE Confidence: 0.98136497

00:02:48.395 --> 00:02:49.514 responsibilities. So we have to

NOTE Confidence: 0.98136497

00:02:49.514 --> 00:02:50.315 keep an eye on mental

NOTE Confidence: 0.98136497

00:02:50.315 --> 00:02:51.755 health as well for these

NOTE Confidence: 0.98136497

00:02:51.755 --> 00:02:53.355 patients. So we really wanna

NOTE Confidence: 0.98136497

00:02:53.355 --> 00:02:55.115 think about supporting patients from

NOTE Confidence: 0.98136497

00:02:55.115 --> 00:02:56.635 a holistic standpoint as they're

NOTE Confidence: 0.98136497

00:02:56.635 --> 00:02:58.095 going through their cancer care.
