

WEBVTT

NOTE duration: "00:01:56.416"

NOTE Confidence: 0.9345318

00:00:04.480 --> 00:00:05.519 Hi, my name is Rachel.

NOTE Confidence: 0.9345318

00:00:05.519 --> 00:00:06.580 I'm one of the PGY4s.

NOTE Confidence: 0.9305315

00:00:07.040 --> 00:00:08.480 I'm currently the consult senior

NOTE Confidence: 0.9305315

00:00:08.480 --> 00:00:10.099 on the inpatient consult team.

NOTE Confidence: 0.8956154

00:00:10.639 --> 00:00:12.340 Hey, I'm Jonah. I'm PGY2

NOTE Confidence: 0.8956154

00:00:12.639 --> 00:00:13.139 neurology

NOTE Confidence: 0.7572612

00:00:13.759 --> 00:00:15.254 and I'm now the consult

NOTE Confidence: 0.7572612

00:00:15.254 --> 00:00:15.754 junior

NOTE Confidence: 0.90193844

00:00:16.454 --> 00:00:18.235 in the inpatient consult team.

NOTE Confidence: 0.95122063

00:00:18.695 --> 00:00:19.974 We see consults for all

NOTE Confidence: 0.95122063

00:00:19.974 --> 00:00:21.574 admitted patients either at the

NOTE Confidence: 0.95122063

00:00:21.574 --> 00:00:23.015 main campus at York Street

NOTE Confidence: 0.95122063

00:00:23.015 --> 00:00:24.454 or at the inpatient psych

NOTE Confidence: 0.95122063

00:00:24.454 --> 00:00:26.134 hospital. This can be anything

NOTE Confidence: 0.95122063

00:00:26.134 --> 00:00:27.600 from altered mental status to
NOTE Confidence: 0.95122063

00:00:27.760 --> 00:00:29.520 abnormal movements to seizures or
NOTE Confidence: 0.95122063

00:00:29.520 --> 00:00:30.020 more.
NOTE Confidence: 0.9258306

00:00:30.640 --> 00:00:31.940 Yeah. So every morning
NOTE Confidence: 0.8460745

00:00:32.320 --> 00:00:34.080 the consult senior will assign
NOTE Confidence: 0.8460745

00:00:34.080 --> 00:00:35.040 me patients to stay in
NOTE Confidence: 0.8460745

00:00:35.040 --> 00:00:35.700 the hospital,
NOTE Confidence: 0.96211344

00:00:36.479 --> 00:00:37.380 both follow-up,
NOTE Confidence: 0.9631961

00:00:38.000 --> 00:00:39.600 cases and new consults that
NOTE Confidence: 0.9631961

00:00:39.600 --> 00:00:40.260 we get,
NOTE Confidence: 0.936206

00:00:40.745 --> 00:00:42.185 for that day. And I
NOTE Confidence: 0.936206

00:00:42.185 --> 00:00:43.465 also carry the pager, so
NOTE Confidence: 0.936206

00:00:43.465 --> 00:00:44.825 I see patients for the
NOTE Confidence: 0.936206

00:00:44.825 --> 00:00:46.365 inpatient strokes and,
NOTE Confidence: 0.85503566

00:00:46.985 --> 00:00:48.025 show codes and also,
NOTE Confidence: 0.9324146

00:00:48.905 --> 00:00:50.025 other codes that have been

NOTE Confidence: 0.9324146
00:00:50.025 --> 00:00:51.385 in the hospital. So I'm
NOTE Confidence: 0.9324146
00:00:51.385 --> 00:00:53.305 on it. As consult senior,
NOTE Confidence: 0.9324146
00:00:53.305 --> 00:00:54.585 I oversee the patient list
NOTE Confidence: 0.9324146
00:00:54.585 --> 00:00:55.705 to make sure that patients
NOTE Confidence: 0.9324146
00:00:55.705 --> 00:00:57.030 are assigned assigned to all
NOTE Confidence: 0.9324146
00:00:57.030 --> 00:00:58.550 the juniors, make sure we
NOTE Confidence: 0.9324146
00:00:58.550 --> 00:01:00.070 follow-up on plans for anybody
NOTE Confidence: 0.9324146
00:01:00.070 --> 00:01:01.430 we've already seen, make sure
NOTE Confidence: 0.9324146
00:01:01.430 --> 00:01:02.710 we're communicating our plans to
NOTE Confidence: 0.9324146
00:01:02.710 --> 00:01:03.989 the primary teams. So in
NOTE Confidence: 0.9324146
00:01:03.989 --> 00:01:05.510 this role, we see the
NOTE Confidence: 0.9324146
00:01:05.510 --> 00:01:07.030 inpatient stroke codes, we see
NOTE Confidence: 0.9324146
00:01:07.030 --> 00:01:07.690 the inpatient
NOTE Confidence: 0.876394
00:01:08.229 --> 00:01:09.830 head bleed alerts and the
NOTE Confidence: 0.876394
00:01:09.830 --> 00:01:11.215 chill alerts. And in the
NOTE Confidence: 0.876394

00:01:11.215 --> 00:01:12.275 beginning, it seems
NOTE Confidence: 0.8858501

00:01:12.655 --> 00:01:13.615 I felt and I thought
NOTE Confidence: 0.8858501

00:01:13.615 --> 00:01:14.495 it was gonna be very
NOTE Confidence: 0.8858501

00:01:14.495 --> 00:01:15.694 overwhelming and it was in
NOTE Confidence: 0.8858501

00:01:15.694 --> 00:01:16.275 the beginning.
NOTE Confidence: 0.9466159

00:01:16.655 --> 00:01:18.175 But then you quickly realize
NOTE Confidence: 0.9466159

00:01:18.175 --> 00:01:19.295 that there are many layers
NOTE Confidence: 0.9466159

00:01:19.295 --> 00:01:20.415 of people who are with
NOTE Confidence: 0.9466159

00:01:20.415 --> 00:01:21.935 you even though they are
NOTE Confidence: 0.9466159

00:01:21.935 --> 00:01:23.615 not initially physically with you.
NOTE Confidence: 0.9466159

00:01:23.615 --> 00:01:25.000 They're also thinking about the
NOTE Confidence: 0.9466159

00:01:25.000 --> 00:01:26.119 patient, checking the patient on
NOTE Confidence: 0.9466159

00:01:26.119 --> 00:01:26.780 the background,
NOTE Confidence: 0.8984777

00:01:27.240 --> 00:01:27.740 and,
NOTE Confidence: 0.99696225

00:01:28.520 --> 00:01:29.020 you
NOTE Confidence: 0.92440695

00:01:29.400 --> 00:01:30.520 ease into it. And then

NOTE Confidence: 0.92440695
00:01:30.520 --> 00:01:31.640 it kind of becomes second
NOTE Confidence: 0.92440695
00:01:31.640 --> 00:01:33.000 nature at some point, and
NOTE Confidence: 0.92440695
00:01:33.000 --> 00:01:34.200 you realize that you were
NOTE Confidence: 0.92440695
00:01:34.200 --> 00:01:35.240 able to put together a
NOTE Confidence: 0.92440695
00:01:35.240 --> 00:01:36.200 lot of the knowledge you've
NOTE Confidence: 0.92440695
00:01:36.200 --> 00:01:36.940 been acquiring,
NOTE Confidence: 0.9803368
00:01:37.319 --> 00:01:38.440 both with seeing the cases
NOTE Confidence: 0.9803368
00:01:38.440 --> 00:01:39.825 and discussing the cases later
NOTE Confidence: 0.9803368
00:01:39.905 --> 00:01:41.045 on with your team.
NOTE Confidence: 0.9573529
00:01:42.384 --> 00:01:43.505 This is a great rotation
NOTE Confidence: 0.9573529
00:01:43.505 --> 00:01:44.225 where you really get to
NOTE Confidence: 0.9573529
00:01:44.225 --> 00:01:45.744 see a broad variety of
NOTE Confidence: 0.9573529
00:01:45.744 --> 00:01:46.244 neurology,
NOTE Confidence: 0.9617958
00:01:46.865 --> 00:01:48.865 concerns and really pushes you
NOTE Confidence: 0.9617958
00:01:48.865 --> 00:01:50.064 to take ownership of patients
NOTE Confidence: 0.9617958

00:01:50.064 --> 00:01:51.185 and prepares you to be

NOTE Confidence: 0.9617958

00:01:51.185 --> 00:01:52.171 at the attending role.
