NOTE duration: "00:00:39.105"

NOTE Confidence: 0.952084

00:00:04.400 --> 00:00:05.519 Hi. My name is Curtis.

NOTE Confidence: 0.952084

00:00:05.519 --> 00:00:06.319 I'm one of the second

NOTE Confidence: 0.952084

00:00:06.319 --> 00:00:07.140 year residents.

NOTE Confidence: 0.96435946

00:00:07.520 --> 00:00:08.400 One of the things I

NOTE Confidence: 0.96435946

00:00:08.400 --> 00:00:09.760 really appreciate about the program

NOTE Confidence: 0.96435946

00:00:09.760 --> 00:00:11.519 is the dedicated time to

NOTE Confidence: 0.96435946

00:00:11.519 --> 00:00:12.019 neurophysiology.

NOTE Confidence: 0.9923884

00:00:13.405 --> 00:00:13.905 So

NOTE Confidence: 0.97709453

00:00:14.445 --> 00:00:15.105 you get

NOTE Confidence: 0.9745591

00:00:15.485 --> 00:00:17.244 dedicated time in both first

NOTE Confidence: 0.9745591

00:00:17.244 --> 00:00:17.805 and second year,

NOTE Confidence: 0.90376246

00:00:19.005 --> 00:00:20.685 initially to read EEGs and

NOTE Confidence: 0.90376246

00:00:20.685 --> 00:00:22.445 then also the introduction of

NOTE Confidence: 0.90376246

00:00:22.445 --> 00:00:22.945 EMGs.

NOTE Confidence: 0.9613244

00:00:23.724 --> 00:00:24.960 I felt that getting this

NOTE Confidence: 0.9613244

00:00:24.960 --> 00:00:26.640 early exposure helped pique my

NOTE Confidence: 0.9613244

00:00:26.640 --> 00:00:28.740 interest in these topics and

NOTE Confidence: 0.9801603

00:00:29.199 --> 00:00:31.199 also will prepare me for

NOTE Confidence: 0.9801603

00:00:31.199 --> 00:00:32.960 the inevitable seizure consults when

NOTE Confidence: 0.9801603

00:00:32.960 --> 00:00:34.340 I'm on the inpatient rotations.
