

WEBVTT

NOTE duration: "00:01:18.976"

NOTE Confidence: 0.94592494

00:00:00.080 --> 00:00:01.199 Most of my patients get

NOTE Confidence: 0.94592494

00:00:01.199 --> 00:00:02.399 referred to me by a

NOTE Confidence: 0.94592494

00:00:02.399 --> 00:00:03.919 community OB GYN or some

NOTE Confidence: 0.94592494

00:00:03.919 --> 00:00:05.380 of our gynecologists here.

NOTE Confidence: 0.9808667

00:00:05.759 --> 00:00:07.040 Patients who come in with

NOTE Confidence: 0.9808667

00:00:07.040 --> 00:00:08.740 concerning symptoms like postmenopausal

NOTE Confidence: 0.95537686

00:00:09.200 --> 00:00:11.119 bleeding or pelvic pain and

NOTE Confidence: 0.95537686

00:00:11.119 --> 00:00:12.375 along their workup that their

NOTE Confidence: 0.95537686

00:00:12.375 --> 00:00:13.815 OBGYN does get found to

NOTE Confidence: 0.95537686

00:00:13.815 --> 00:00:15.815 have a suspicious mass or

NOTE Confidence: 0.95537686

00:00:15.815 --> 00:00:17.575 even a cancer diagnosed from

NOTE Confidence: 0.95537686

00:00:17.575 --> 00:00:20.055 their OBGYN's office. The cancers

NOTE Confidence: 0.95537686

00:00:20.055 --> 00:00:21.355 that I treat are challenging

NOTE Confidence: 0.9390869

00:00:21.735 --> 00:00:22.635 because oftentimes

NOTE Confidence: 0.9605713

00:00:22.935 --> 00:00:24.614 their symptoms are silent, and
NOTE Confidence: 0.9605713

00:00:24.614 --> 00:00:26.135 so we don't identify the
NOTE Confidence: 0.9605713

00:00:26.135 --> 00:00:27.895 cancer like ovarian cancer until
NOTE Confidence: 0.9605713

00:00:27.895 --> 00:00:29.090 it's in its advanced stages.
NOTE Confidence: 0.9775854

00:00:29.390 --> 00:00:30.430 And we're kind of there's
NOTE Confidence: 0.9775854

00:00:30.430 --> 00:00:31.150 a lot we can do
NOTE Confidence: 0.9775854

00:00:31.150 --> 00:00:32.190 nowadays, but we're kind of
NOTE Confidence: 0.9775854

00:00:32.190 --> 00:00:33.550 starting from behind, if you
NOTE Confidence: 0.9775854

00:00:33.550 --> 00:00:34.670 will, when the cancer is
NOTE Confidence: 0.9775854

00:00:34.670 --> 00:00:36.270 already spread. The treatments for
NOTE Confidence: 0.9775854

00:00:36.270 --> 00:00:37.630 our patients are definitely a
NOTE Confidence: 0.9775854

00:00:37.630 --> 00:00:39.070 hundred percent customized for each
NOTE Confidence: 0.9775854

00:00:39.070 --> 00:00:40.750 person. I offer surgical and
NOTE Confidence: 0.9775854

00:00:40.750 --> 00:00:42.185 medical treatments for cancer and
NOTE Confidence: 0.9775854

00:00:42.185 --> 00:00:42.685 precancer.
NOTE Confidence: 0.95363075

00:00:43.305 --> 00:00:44.265 So some of the times

NOTE Confidence: 0.95363075
00:00:44.265 --> 00:00:45.705 that means like taking the
NOTE Confidence: 0.95363075
00:00:45.705 --> 00:00:46.985 patient to the operating room
NOTE Confidence: 0.95363075
00:00:46.985 --> 00:00:48.505 to remove their uterus if
NOTE Confidence: 0.95363075
00:00:48.505 --> 00:00:49.625 they have a uterine cancer
NOTE Confidence: 0.95363075
00:00:49.625 --> 00:00:51.145 or precancer which often cures
NOTE Confidence: 0.95363075
00:00:51.145 --> 00:00:52.425 them of their disease or
NOTE Confidence: 0.95363075
00:00:52.425 --> 00:00:53.785 doing a combination of a
NOTE Confidence: 0.95363075
00:00:53.785 --> 00:00:54.684 targeted chemotherapy,
NOTE Confidence: 0.91503906
00:00:54.985 --> 00:00:55.448 a systemic chemotherapy with a
NOTE Confidence: 0.91503906
00:00:55.448 --> 00:00:56.045 surgical intervention,
NOTE Confidence: 0.9759314
00:00:58.180 --> 00:00:59.300 somewhere along the line of
NOTE Confidence: 0.9759314
00:00:59.300 --> 00:01:00.899 their treatment. So once a
NOTE Confidence: 0.9759314
00:01:00.899 --> 00:01:02.340 patient has a GYN cancer
NOTE Confidence: 0.9759314
00:01:02.340 --> 00:01:03.460 diagnosis and they come to
NOTE Confidence: 0.9759314
00:01:03.460 --> 00:01:05.060 see me in clinic, I
NOTE Confidence: 0.9759314

00:01:05.060 --> 00:01:06.020 kind of follow them for
NOTE Confidence: 0.9759314

00:01:06.020 --> 00:01:06.819 the rest of their life.
NOTE Confidence: 0.9759314

00:01:06.819 --> 00:01:07.940 And we're watching them really
NOTE Confidence: 0.9759314

00:01:07.940 --> 00:01:09.380 closely for recurrence, but also
NOTE Confidence: 0.9759314

00:01:09.380 --> 00:01:10.260 to make sure that their
NOTE Confidence: 0.9759314

00:01:10.260 --> 00:01:12.340 survivorship needs, their life after
NOTE Confidence: 0.9759314

00:01:12.340 --> 00:01:13.541 cancer, or life with cancer
NOTE Confidence: 0.9759314

00:01:13.541 --> 00:01:14.421 is as full as it
NOTE Confidence: 0.9759314

00:01:14.421 --> 00:01:15.160 can be.
